DETAILED ACTION

Allowable Subject Matter

1. Claims 10 and 13 - 14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As to claim 10, the present invention discloses

wherein if the control unit determines that the extension of the still image file is not JPG, the reproduction unit outputs a predetermined video signal for notifying a user that the optical disk reproducing apparatus cannot reproduce the still image file,

wherein if the control unit determines that the extension of the still image file is JPG, the header analysis unit starts analyzing the header of the still image file to determine whether or not a marker FFC2 indicative of the progressive JPEG format is present in a range from a marker FFD8 indicative of an image start to a marker FFDA indicative of scan start,

wherein if the marker FFC2 is present in the range from the marker FFD8 to the marker FFDA, it is determined that the still image file is compressed in the progressive JPEG format and the reproduction unit outputs the predetermined video signal,

wherein if the marker FFC2 is not present in the range from the marker FFD8 to the marker FFDA, it is determined that the still image file is not compressed in the progressive JPEG format and the control unit determines whether or not a code of JFIF or a code of EXIF is included in the header of the still image file,

wherein if the control unit determines that neither the code of JFIF nor the code of EXIF is not included in the header of the still image file, the reproduction unit outputs

the predetermined video signal,

wherein if the control unit determines that either the code of JFIF or the code of EXIF is included in the header of the still image file, the second decoding unit decodes the still image file and outputs the decoded still image file to the reproduction unit, and wherein the reading unit stops reading the image data and the second decoding unit stops decoding the still image data while the header analysis unit analyses the header of the still image file.

None of the cited references St. Pierre (US 6,853,851), Ito et al (US 6,937,356 B1), Anderson et al (US 5,349,348) and Um et al (US 2003/0118327 A1) renders the above limitations obvious.

Claims 13 and 14 depend on claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
